Professional Summary:
Results-oriented Senior Software Engineer specializing in scalable web applications and RESTful API development. Proficient in Laravel, PHP, and Vue.js, with a strong history of delivering secure administrative dashboards and complex API integrations for global clients in Japan and the United States.

Technical Skills

Languages & Frameworks:
PHP, Laravel, JavaScript, React, NextJS, Vue.js, Node.js, NestJS, HTML/CSS

Backend - API Architecture:
RESTful APIs, Webhooks, Queue Management (Redis/SQS), Cache Optimization, Swagger, Postman, PHPUnit.

DevOps Infrastructure:
AWS, Docker, GitHub Actions (CI/CD Pipelines), Nginx, Apache, Linux (Ubuntu), Firebase

Databases:
MySQL, MongoDB.

System Design:
OOP Principles, DB Client (MySQL Workbench, DBeaver), Wireframing (Axure, Balsamiq), Clean Architecture

CMS | CRM:
Drupal, WordPress, CraftCMS, Mailchimp, HubSpot.

Version Control & Collaboration:
Git, GitHub, GitLab, Bitbucket, Jira, Notion, Redmine.

Development Tools:
PHPStorm, VS Code, Figma, SendGrid.

AI Tools:
GitHub Copilot, Claude Code, Codex, Gemini, Antigravity.

Work Experience

atB Lab Ltd. (Japan-based) – Senior Software Engineer Jan 2022 – Present

- **API Architecture:** Architected and developed RESTful APIs and optimized database schemas to support mobile app and web platforms.
- **System Optimization:** Integrated Webhooks, Queues, and Caching mechanisms to improve application response times and scalability.
- **Security & Infrastructure:** Developed secure, scalable admin dashboards and managed deployment workflows using AWS and GitHub.
- **Leadership:** Conducted code reviews to ensure high-quality standards and mentored cross-functional teams on modern API standards.

Sourcetop Inc. (USA-based) – Software Engineer Jan 2017 – Dec 2021

- **Full-Stack Development:** Built custom modules and interactive front-end components for high-traffic sites like Revolver Magazine and Milk Street.
- **Code Quality:** Authored clean, maintainable code following strict OOP principles to minimize technical debt.
- **Project Planning:** Led wireframe design and project workflow documentation to align technical execution with client requirements.

Key Project

nexthehub.com

Engineered a time-slot-based reservation system and RESTful API. Implemented Webhooks for third-party API integration and developed automated reporting and invoicing systems based on user consumption.

atb-jobs.com

Architected the core Admin panel, Employer portal, and Candidate site for a mobile job platform. Managed complex scheduled operations and successfully led a major framework migration from Laravel 7 to 11 to ensure security and performance. Integrated Facebook Graph and LinkedIn APIs for automated social sharing, and implemented Google Instant Indexing for real-time job post visibility.

admin.happiness-planet.org

Developed a multi-organization user activity tracking system for mobile applications. Implemented granular Role-Based Access Control (RBAC) to manage diverse user activities across organizations.

www.revolvermag.com

Scaled and maintained a high-traffic music news and media platform specifically for the USA market.

www.amuref.com

Built a secure loan management system powered by robust API integrations to streamline financial processes.

www.177milkstreet.com

Developed a recipe publishing magazine platform with a subscription-based access model tailored to specific user packages. Implemented feature updates and UI changes based on A/B testing results to optimize user engagement.

Education

2015 B.Sc. in Computer Science & Engineering - Asian University of Bangladesh CGPA: 3.56/4.00
